TRADE FAIRS DECEMBER: A FRENCH MONTH FOR DULEVO

5000 Zero queen of France

Dulevo officially presents its new naturally powered 5000 at the “Salon des Maires” and “Pollutec”, two of the most important French exhibitions.

From mid-November till the beginning of December 2008, France hosted two of the most important trade fairs in the urban cleaning sector. The first, held in Paris from 24-26 November, was the *Salon des Maires*, an exhibition entirely dedicated to municipalities, which saw the direct participation of our French branch office, **Dulevo France**; the following week, from 2-5 December, the 23rd edition of *Pollutec*, the most important international trade fair for the equipment, technology and environmental services market was held in Lyon, confirming its supremacy as the world's leading event.

At both exhibitions, Dulevo presented the new 5000 Zero model, the only naturally powered mechanical-suction sweeper in the world. A knowledgeable and enthusiastic public gave Dulevo satisfaction, showing interest in the new sweeper model and demonstrating that the efforts made over the last few years to produce an “eco-friendly” machine suitable for all the requirements of all cities, have been worthwhile and appreciated by municipalities throughout Europe.

[and ring binders](#).

You will find codes and prices for ordering them in the “gadgets” section of the 2009 Price List.

PRIZES DULEVO WINS THE PRESTIGIOUS BRITISH PRIZE

5000 veloce

best sweeper of the year

Considered the most important prize for machine manufacturers.

On 5 November 2008, the official ceremony for the presentation of the *CIWM Awards*, the most prestigious British prize for the manufacturers of machines for municipalities and state-owned enterprises, was held.

After careful selection by a judging panel of technical experts and sector journalists, the 5000 Veloce (equipped with the GORE® filter) won the coveted “*Vehicle of the Year*” prize for the best machine of the year. A great achievement for all involved and the quality of the Dulevo brand has once again been confirmed.

EVENTS DDV OPENS THE DOORS OF ITS NEW FACTORY

Dealers are growing

*DDV, our historical German dealer, officially opens its new premises in Krefeld.
A new base for a constantly improving service.*

On 15 and 16 December 2008, in the presence of more than 150 guests, DDV, Dulevo's historical German dealer, celebrated the inauguration of its new factory in Krefeld, Germany.

The factory covers an area of 3500 sq. m., with buildings covering approx. 1650 sq. m., 500 sq.m. of which are occupied by the machine shop and by offices, while the rest is occupied by warehouses. The factory was designed to have a low environmental impact and was built in less than 100 days.

A great accomplishment for DDV, but also for Dulevo. Whenever we see one of our dealers growing so successfully, we feel proud and happy for their good results, which are also our own. The new factory is the first step towards a new era of successes, achievements and new challenges to be faced.

EVENTS DULEVO, PROTAGONIST IN QUANZHOU

Dulevo in China: not just Olympics

During the "National Farmers' Games" the local authorities purchase a 200 quattro

At the end of October, in Quanzhou, in the province of Fujian, in Southern China, the sixth *National Farmers' Games* was held. A quadrennial event that was first held in 1988 and during which more than 3500 farmer-athletes from all 32 of the Chinese provinces get together.

The novelty this year was, however, that the municipality of Quanzhou decided to purchase a 200 quattro model sweeper for the cleaning services required throughout the event. The sweeper worked incessantly for seven days, giving ample proof that it is machine particularly suitable for continuous, heavy-duty work. In the light of its great success, the machine was purchased by the local authorities of Quanzhou and will perform the cleaning services in the city from now on.

PRESTIGIOUS DELIVERIES

15 STREET WASHERS FOR AMSA

Milan: never so clean!

The last of a series of 15 machines to be delivered

On 20 January the last of a series of 15 street washing machines (eleven 5000 Hydro models and four 200 Hydro models) that Dulevo is supplying to AMSA, a municipality-owned company in Milan, are scheduled to be delivered.

These further 15 machines were assigned on 7 August 2008, following an extremely detailed and complex call for tenders. The vehicles will be equally divided (two 5000 Hydros and one 200 Hydro) among the factories of Olgettina, Zama, Primaticcio, while five 5000 Hydros and one 200 Hydro will go to the Silla factory.

There has been a consolidated relationship between Dulevo and AMSA for several years now; the Milanese company is well aware of the absolutely exceptional quality of each machine produced by the Fontanellato factory. This occasion has furnished still further proof.
